願景

Vision

We envision art as essential to the human character. We use art to explore, communicate, create and express i.e. to create new "language" and shared cultural space.

Art is a gift for us to approach the world, give meaning, share values and enjoy.

We envision a society based on equal opportunity for members to explore the world through art so as to shape their life, as they would like. Those who are passionate and talented in art should be nurtured and provided opportunity to grow.

Approach

Dance/Movement is the fundament and main pillar of BAU, which will open up participants' senses and readiness to be creative and able to enjoy art.

To maintain quality, BAU invites professional artist and art educators to guide the group in her long-term growth and projects.

BAU has organized a number of workshops, performances and touch art installation exhibitions since 2001, which have induced resound in the local art community and received wide support from the participants, audience and the public.
